Protect Families: Submit Your Comment to Oppose Public Charge Rule

Join (**INSERT NAME OF ORG**) in denouncing the Trump Administration's deeply flawed [proposed public charge rule](#) that would undermine decades of progress in reducing hunger in our state and across the country. The proposed rule will increase poverty, harm health and learning, and weaken our communities.

The mean-spirited proposed rule unravels longstanding, sound public policy that draws a clear line between the nutrition, health, housing and other public benefits that may be used without causing public charge consequences, and those that may not. It dramatically expands the list of programs that could trigger a public charge determination with adverse immigration consequences. Read the Food Research & Action Center's (FRAC) [statement](#) and [factsheet](#).

As the nutrition lead on the [Protecting Immigrant Families \(PIF\) Campaign](#) Steering Committee, FRAC has launched a [platform](#) for the public to weigh in on how this rule will make hunger and poverty in this country far worse. **Deadline to submit comments is on or before December 10, 2018.**
